> Tech-savvy engineer with 10+ years at Orient Overseas Container Lines (OOCL), now Technical Assistant Manager / Full-Stack & AI Engineering Lead. Pioneered modern full-stack delivery in the Philippines and currently spearheads AI adoption across the team. Well-versed in all phases of the software development lifecycle with strong fundamentals in algorithms and data structures.

SKILLS

* Software Development & Architecture
* Team Leadership & Mentorship
* AI & Agentic Systems
* Solutions Deployment & DevOps
* Debugging and Troubleshooting
* Requirement Definition
* Coding and Scripting
* Testing and Documentation

TECHNOLOGY SUMMARY

Frontend

- React
- Vue
- Angular
- Ext JS

Mobile

- Android Studio
- Flutter
- React Native
- NativeScript

Backend

- Java, Spring Boot
- PHP (Laravel, CodeIgniter)
- Node.js
- Tibco BW

Databases

- MySQL
- Oracle DB
- MongoDB

AI & Agentic Systems

- LLMs, MCP, Prompt Engineering
- Google ADK, Gemini, Claude API
- Ollama, OpenClaw

DevOps & Cloud

- Docker, Jenkins, Git/GitLab, CI/CD
- Google Cloud Platform, Cloud Run
- Firebase, Heroku

Systems: Unix, Linux, Windows

PROFESSIONAL EXPERIENCE

Orient Overseas Container Lines (OOCL)

March 2015 — Present

Technical Assistant Manager / Full-Stack & AI Engineering Lead (current)

- 2025 Spearheading AI adoption for the department; built a 6-week AI knowledge-building program for the team.
- 2019 Pioneered "Mode 2" delivery in the Philippines — modern full-stack projects built with current technology (React, Spring Boot, and similar) — standing up a new department focused on new technology.
- 2018 Supported the Booking & Shipment module, the core module of the company's enterprise platform, serving a large, active user base.
- 2018 Served as ITA Bootcamp teacher — mentored and assessed students and helped unblock their learning.
- 2017 Pioneered an internal Tech Community, inviting outside speakers to share emerging technology with fellow engineers.
- 2016 Built a rule engine on the MEAN stack (MongoDB, Express, Angular, Node) that dynamically resolves the correct field value from a set of instruction protocols, with nested parent-child relationships.
- 2015 Joined as Software Engineer; completed ITA Bootcamp as top student.

International Assignments

Zhuhai, China — ITA Bootcamp Student (3 months)
Hong Kong — ITA Bootcamp (1 week)
Zhuhai, China — Company Representative (2 days)
United States — Extended Assignment (1.5 months)
Zhuhai, China — ITA Bootcamp Teacher (2.5 months)
Hong Kong — Company Representative (2 days)
California, USA — Training & Project Assignment (4 months)

SM Prime Holdings, Inc. June 2014 — January 2015

Internship — Tech Support & System Developer

Developed web applications in PHP for the SM Group's shopping mall business; started in technical support before transitioning into systems development.

EDUCATION & CONTINUED LEARNING

Asia Pacific College — BS Computer Engineering, May 2015
Dean's Lister (2011) · SM Foundation Scholar — Full Scholarship

Paranaque National Highschool (DOST) — Science Highschool, 2010

Google Academy — Cohort 1 Graduate

Dify (LLM Application Development) — Udemy

SIDE PROJECTS

Weather Agent — AI agent (Google ADK + MCP + Gemini) deployed on Cloud Run.

Stikwel (2021) — Built from scratch: a platform for hosting photos, videos, and video tutorials.

PaaS — Payroll-as-a-Service — Pentacode Inc.'s first product: a cost-effective HRIS + payroll solution.

Website Generator — Claude API-powered site generator with live SSE progress streaming.

Bolero Detector — Computer vision tool that auto-detects basketball scoring events from video.

JavaFX-AutoUpdater — Open-source Java auto-update library with CI/CD and community contributions.

See github.com/pvbarredo for sample projects and open-source work. Additional work samples available on request.
